Emypeople SafeSentryPro Instruction Manual

Have you completed your Weatec application?

If not, contact your deacon for an application before continuing

to setup this Weatec approved filter!
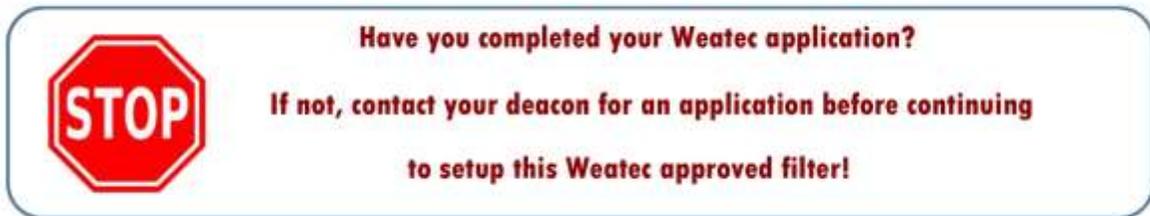

Who is it for?

SafeSentyPro, a web-filtering solution offered by Emypeople, can be used either through a proxy connection or on a hardware appliance. SafeSentryPro tested well, although the categories are not configurable by the end user at this time.

The proxy installation can be enforced by Emypeople's Dynamite Protector software. In testing, the proxy solution worked OK, except for some security errors due to using a proxy service. Since the internet connection is dependent upon the proxy server, you will lose your connection to the internet if Emypeople's proxy server goes offline. Also, speed normally takes a hit when using proxy connections. The appliance-based version offers higher performance along with a higher start-up cost.

Pros:
● Filtered well in testing
● Anabaptist-run company behind the solution
● Appliance available for businesses desiring higher performance
● Cloud filtering option more economical for small businesses

Cons:
● Cloud filtering option: dependence on proxy server introduces single point of failure
● Cloud filtering option: proxy connection slows down internet speed

Note: *After testing, Emypeople SafeSentryPro has been approved as an acceptable content filter according to the requirements set forth in the* <u>*Weaverland Conference Electronic Technology Usage Guidelines*</u>*. Please remember that no filter can be guaranteed to filter out all objectionable content; therefore the Weatec Accountability Software must be installed on all devices in order to be in compliance with Weaverland*

Conference guidelines. The accountability software logs all web traffic, thus fostering brotherhood accountability. So even if objectionable content is missed by SafeSentryPro, the content will still trigger a flag on the accountability server. Use the Weaverland Conference template as a minimum; there is nothing preventing you from choosing stricter settings.

How to Acquire

Find more details at www.emypeople.net/safesentrypro.htm. To ask questions, learn current pricing, or get started with SafeSentryPro, call Emypeople at 717-277-0200, email them at support@emypeople.net, or use their contact page: www.emypeople.net/contact/contact.htm.

How to Install

Work with Emypeople to install SafeSentryPro.

How to Configure

Since Emypeople configures SafeSentryPro, there are no settings for you to change.

How to Get Help
